# WHY CHOOSE TANGYE JACKS?

Choose Tangye jacks for their sustainability, superior build quality, unmatched performance, and user-friendly features. Trust in our product to enhance your productivity and ensure a safer working environment. Experience the difference in quality and performance with Tangye's state-of-the-art hydraulic solutions.

## Reliability, Quality and Sustainability

Choose Tangye for a quality, sustainable jack you can rely on time and time again.

## Top-Notch Safety Features

With safety in mind, every jack is fitted with overload and overstroke protection, giving you peace of mind regarding the health and safety of your operators.

## Wide Range of Capabilities

With a wide range of capabilities from 10 tonne to 100 tonne our aircraft jacks are suitable for all major airlines and aircraft. Utilizing aerospace-grade aluminum, our jacks are lighter and more portable without compromising on strength. The extendable screw with a custom socket design is tailored to suit multiple aircraft types, providing versatility and reliability.

## Ready to Use Immediately

Our jacks are immediately ready to use straight out of the box; no need to change fittings, connect hoses, or pumps, resulting in zero setup time or costs.

## Portable and Space-Efficient

Lightweight, compact, and portable, our jacks are easily transportable and take up minimal storage space.

## User-Friendly Operation

Ease of use by a single operator with no additional training required saves essential time on the job.

## Low Maintenance

Extremely low maintenance and easily serviceable by the user, our jacks eliminate downtime and hassle.

## Manufactured to the Highest Standards

Our jacks are fully manufactured, assembled, and tested at our premises in the UK. Our precise engineering, stringent testing, and ISO9001 Quality Management System guarantee quality assurance.
